

The state rule against the best schedule, review at 0.5 H (not the registered regime)

saving over the best schedule, % of retry's cost

..... no cap at all (step ii) - - - rule fitted here — rule fitted elsewhere

Positive: the rule is cheaper than step iii-b. No intervals are computed in this regime. Where the dotted line leaves the frame, not capping at all costs far more than the schedule. † Qwen3 Codet's dollar figures rest on an imputed price (PLAN.md Section 10).
